

Beaver Moon Sunday Brunches

The full moon that appears in November is called the Beaver Moon. Some say it comes from Native Americans setting beaver traps during this month before the swamps froze to ensure a supply of warm winter furs. Others say that the Beaver Moon comes from the heavy activity of beavers building their winter dams.

Join us for a delicious Sunday brunch in our beautiful lakeside dining hall and enjoy a short presentation about the life of beavers.

**November 10
November 17
November 24**

11 a.m. to 1 p.m.

with short presentation
about beavers at
11:45 and 12:45

on the east side of Grindstone Lake near Sandstone, MN

New Year's Eve at the Lake

Tuesday, December 31 • 6:00 p.m.

Minnesota's Weather History: Storms, Stories, and Significant Events

with Dr. Mark Seeley, Extension Climatologist and Professor in the Department of Soil, Water, and Climate at the Univ. of MN

Minnesota is paradise to a weather enthusiast because of its rich history of climate observations as well as documentation of significant and traumatic historical events and episodes driven by weather. Our culture, our societal infrastructure, our landscape has indeed been shaped by weather. Sharing our history through stories and showing how our climate behavior has shaped our lives will be an emphasis of this presentation, along with sharing a few fun facts.

RESERVATIONS ARE REQUIRED

**Appetizers start at 6:00;
presentation follows dinner.**

Adults: \$25 Early Bird
reservations/\$30 for
