

THE CRIME SCENE...

The Year: 2014

The Place: Mora, Minnesota

Welcome to the Tenth Anniversary Memorial of the Feed Mill Tragedy

This night, on the first full moon on this exact date since the fateful fire, we honor those who came before us.

The fire ball that consumed the Mill was a heartbreaking and terrifying site for all who witnessed it.

The Mill Owner, Myron Clark was burned beyond recognition. Myron, City Administrator Lester Dine and twelve other firemen were preparing the building to be demolished the next day.

*Only Lester managed to escape the awful fate-
though forever sentenced to life in a child's mind.*

Many of the ashes from the fire still lay under the wood chips and gravel on the corner.

On full moon nights thousands of bats hover over the site where they lived so comfortably for so long.

*It is also told that Park Forest Estates was built upon a graveyard that was full of alleged witches
that were burned at the stake back in the 1600's. The area is completely haunted.*

*And since the fire, animals from the apartment complex and the vicinity have mysteriously disappeared:
cows, sheep, goats, dogs, chickens - even a few people.*

No one understands it but everyone considers this once quaint little town of Mora cursed.

*The entire lot is now up for auction and despite its dark and tragic history,
there are some people here who want the property and will do whatever they can to get it.*
